BLE HID keyboard example in PsoC Creator 3.3:

The example is made for the CY8KIT-142 / CY8C4247LQI-BL483

This version can't be loaded into the CYBLE-222005-EVAL module

changing target device to to CYBL10573 does not function:

Which device is to be selected, to be able to connect to the CYBLE-222005-00 ?
